Lab: Refactoring

For performing this lab we will use <mark>VS2022</mark> **Enterprise**.
For the code in the given C# project (see the file *Lab_Refactoring.zip*) perform the following tasks:

1. Read and understand explanations about refactoring (see the file *Lab-Refactoring.pdf*).

2. Rewrite the code according to 'Refactoring' rules. Try to make all necessary changes up to the current rule before consideration of the next rule.

3. Present your solution to the lecturer during the lab.

Note: Be ready to answer questions about terms and your solution.
